

iOS Project Interview (Order Book)

Overview

Goal

- Make an app with working “order book” & “recent trade” features.
- Receive real-time data via web-socket and render them on screen.
 - Use BitMEX for market data.
 - See: <https://www.bitmex.com/app/wsAPI>
- Implement top section tab control.
 - Excluding chart. Only Order Book and Recent Trades.

- Implement OrderBook / RecentTrade.
 - If you need an example, see here — <https://www.bitmex.com/app/trade/XBTUSD>
